

JMC-YOUTH: MENTORING & DISCIPLE-MAKING

OCTOBER 2, 2020

As our familiar surroundings – schools, work places, shopping, etc. - are being shaped by COVID-19, JMC-Youth is also adapting its approach to carry out the churchwide direction of disciple-making for the youth from grade 7 to 12. While using online tools is now part of the new norm, person-to-person interaction and relationship building still hold the keys to foster an environment to follow Jesus together.

As a result, JMC-Youth is making changes to improve the engagement experience for learning and applying God's Word. Also, several regular programs will be integrated to focus on disciple-making. The new direction will include:

- Emphasizing the new engagement format through relationship
- Learning how to follow Jesus as His disciples according to the Bible
- Integrating the mentoring, Sunday School and Bible Quiz programs into one
- Engaging in small group format for building relationship: about 1 discipler with 1-3 young disciples
- Allowing flexibility in time, location, and format for personal interaction about every 2 weeks
- Conducting supplementary sessions on special topics.

To equip the disciplers and mentors of this disciple-making movement, JMC-Youth and EMC have launched a new joint initiative - IGNITE for Inter-Intentional, Training & Equipping. EMC equip the disciplers and mentors, who mentored by mature Christians. disciple-making program and IGNITE will mentorship and discipleship of Jesus' followers.

Generational Nourishment, will provide training seminars to then can also be disciplined and Combined, JMC-Youth's integrated build an inter-generational chain of

The integrated program will start after mid-October. To join the program to become a follower of Jesus, parents are invited to register their teenagers at <https://emc.ecac.ca/registerjmc>. For more information, please contact Andrew Leung at andrew.leung@ecac.ca.

In addition, JMC-Youth is recruiting new disciplers and mentors for the integrated program. If you have passion in molding and connecting to the next generation, please contact Andrew Leung at andrew.leung@ecac.ca.
